

TA KHAC KHOAN

FULL-STACK DEVELOPER

takhackhoan@gmail.com | 0944183376 | Thu Duc City, HCMC
github.com/khackhoan0103

Software Engineering graduate with hands-on experience developing and deploying end-to-end web applications. Experienced in building frontend and backend systems, integrating AI and third-party services, and deploying application components to VPS/cloud environments.

TECHNICAL SKILLS

- **Frontend:** React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Ant Design, Context API, React Hooks
- **AI & Integrations:** Google Gemini Multimodal APIs, Vector Embeddings, Semantic Search, Cosine Similarity, RESTful APIs
- **Backend:** Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, ASP.NET Core, .NET Web API
- **Databases & Tools:** SQL Server, MySQL, Firebase, Git, Docker
- **Concepts:** Data Structures & Algorithms, OOP, Problem Solving
- **DevOps & Deployment:** Docker, Git/GitHub, VPS Deployment, Cloud Deployment, Linux, Application Configuration, Database Deployment

EXPERIENCE & TRAINING

FPT Software Academy — Java Full-stack Fresher Training

Jan 2026 – Jul 2026

- Developed team-based web applications using Java, Spring Boot, React, SQL, RESTful APIs, Git, and Agile/Scrum practices.
- Worked across backend and frontend development, API integration, database-driven features, and feature testing throughout the software development lifecycle.

FPT Software Academy — .NET & React Internship

Dec 2024 – Apr 2025

- Developed and tested full-stack features using ASP.NET Core Web API, React, TypeScript, and SQL Server in an Agile development environment.
- Integrated RESTful APIs, worked with relational databases, and resolved application issues through debugging, testing, and collaboration with team members.

EDUCATION

- **FPT University (2022 - 2026)**

Bachelor of Software Engineering

Orientation: Korean Bridge System Engineer (BrSE)

PROJECTS

2026 CosMate – Full-stack & AI Integration Developer [Github](#)

FPT Software Academy Project | FPT University Capstone Project

Technologies: Java, Spring Boot, React, React Native, SQL Server, Gemini APIs, Docker, Docker Com

- Built a multi-tenant cosplay rental and service-booking platform supporting 3 user roles and 80+ RESTful APIs.
- Implemented AI-powered pose scoring and personalized recommendations using Gemini Multimodal APIs, vector embeddings, semantic search, and cosine similarity.
- Improved reliability of long-running AI workflows using Spring Async and TransactionTemplate, with retry, scheduled recovery, and API fallback handling.
- Deployed frontend, backend, and database components to VPS/cloud environments and configured application services for end-to-end online operation.

2025 CineManage System – Full-stack Developer [Github](#)

FPT Software Academy Project

Technologies: ASP.NET Core Web API, React, TypeScript, SQL Server, SignalR, JWT, VNPay, Cloudinary

- Built end-to-end cinema booking features through 50+ RESTful APIs covering movies, showtimes, seat booking, ticketing, payments, and administration.
- Implemented JWT-based authentication and personalized booking features, integrating chatbot and recommendation services into the booking workflow.
- Integrated real-time seat locking with SignalR, along with validation and error handling across core booking workflows.

2025 KoiCareHome – Full-stack Developer [Github](#)

Technologies: Java, Spring Boot, React, SQL Server, Spring Data JPA, Spring Security

- Built full-stack fish and pond management features through 50+ RESTful APIs using Java, Spring Boot, React, and SQL Server.
- Implemented database-driven features and data persistence using Spring Data JPA.
- Implemented authentication and authorization using Spring Security to secure application access.

LANGUAGES

- Korean: Intermediate — TOPIK Level 3 certified
- English: Upper-intermediate
